✅ Hands-on experience with live projects and real clients

✅ Performance-driven learning and career growth opportunities

---

👀 **Who Should Apply?**

 We're looking for **analytical, curious, and adaptable individuals** eager to build a career in

Business Analysis within a fast-paced tech consulting environment.

- Final-year students or recent graduates (Bachelor's or Master's in IT, Business, or related fields)
- Strong interest in software products, automation, and digital transformation
- Ability to interpret data and document insights clearly
- Good communication and stakeholder interaction skills
- Eagerness to learn, problem-solve, and collaborate proactively
- Interest in requirement gathering, process mapping, and solution evaluation

🛠️ **Key Responsibilities (Daily Operations)**

- Gather, analyze, and document business requirements
- Map client needs to product and technical capabilities
- Prepare BRDs, process flows, and user stories
- Support internal teams with requirement clarity and prioritization
- Coordinate with technical and product teams for solution alignment
- Assist in data analysis and operational reporting
- Participate in solution discussions and functional planning
- Maintain structured documentation and internal reports

💼 **Tools & Focus Areas**

- CRM/ERP platforms (Salesforce exposure preferred)
- Workflow automation tools
- Spreadsheets, dashboards, and reporting frameworks
- Process flow and system mapping methodologies
- Understanding product logic and business outcomes

🎁 **What You'll Gain**

- Real-world experience in the Salesforce ecosystem
- Exposure to the consulting and solution lifecycle
- Opportunity to convert into a full-time role post-internship
- Professional development in business analysis, client communication, and tech consulting
- Experience working with a dynamic, global team on cutting-edge solutions

🧠 A Note from Us

We're not looking for perfection, we're looking for **passion and potential**. If you're excited about building a career at the intersection of **technology and business**, and you're ready to learn and grow, we'd love to hear from you.
